African Press International - API

Interested: Michelle Obama tape airing and Imam's document(s) release? Register and be contacted

The American elections is now behind us. To the run up to the elections the Michelle Obama interview tape come into light and many people have since then shown great interest to get the tape aired so that they judge for themselves, what the contents may mean to the American people.

It is important now to be calm and do the right thing.

To be able to do so without the interference by those against the release of Michelle Obama tapes and the Imam's document on Barack Obama, API has taken the following decision:

- 1. To release the Michelle Obama tapes either through broadcasting, our website or by directly sending a link to the tapes to registered readers only.*
- 2. To release contents on Imam's document by following the steps as in nr. 1.*

If API decides to release the link to the readers it will make no announcement. However because of the disgusting behaviour of some readers who have all along been against us by insisting that nothing should be released, we have decided to screen our readers and only be open to those good to API.

To achieve this, those readers interested in any further information on the two topics are required to do the following:

API story on Michelle Obamas telephone call

1. Register with us their real full names
2. Register with us their real email address
3. Register with us their real telephone number(s)
4. Register their country of residence.

Omission of any of the above 4 requirements, will mean we will not include you in our list of those to receive the link if we decide not to broadcast but release the information through the link.

Information send as required above will be compiled into one list and that list will be the only list that API will use.

On receiving the information, it will be screened thoroughly in order not to give the link to a person who is against us, and our intentions to release the tape(s) and document(s).

The release of the link is the most probable in order to avoid giving the enemies of API any chance to know anything and disrupt our plans.

Those of you who have given us their emails and telephone numbers do know that we are real and they know none of their personal information has been misused in any way the last one month since receiving them.

Any personal information received will be well taken care of and used for the purpose intended.

If API has your email and telephone number , it is still important to register here as required if you as a reader want to get into the list.

We have chosen to be very careful on how to handle information on the two topics because we have realised that there are evil people out there doing all they can to cover up for the Obama's.

If you are not feeling it safe for you or that you do not wish to trust us, you are at liberty to opt from registering here. This is to be done on a free will.

Note: To be very sure you get your details in the list, make sure that the form is fully completed and marked "Registration" on the subject box if it is required.

The same list will be used to inform the readers of our new WWW address that will be launched in a number of days.
